

User Persona Report – Movie Enthusiast

Introduction

A user persona is a fictional representation of a target user created using research and assumptions about user behavior. It helps designers understand user needs, goals, and challenges while developing a product. This persona represents a movie enthusiast who frequently uses OTT platforms and movie-related applications.

Persona Overview

Name: Vijay

Age: 22 Years

Occupation: B.Tech Student

Location: Bangalore, India

Vijay is a tech-savvy student who enjoys watching movies and web series across various genres. He regularly uses OTT platforms and likes exploring both popular and underrated content. Before choosing a movie, he usually checks trailers, ratings, and reviews. He prefers a seamless viewing experience and values personalized recommendations.

Personality and Interests

- Analytical while selecting movies.
- Moderately planned and organized.
- Enjoys entertainment during weekends and leisure time.
- Interested in movies, web series, gaming, music, and photography.
- Uses smartphones, laptops, and smart TVs for content consumption.

Goals

- Discover movies and shows based on personal preferences.
- Receive accurate and personalized recommendations.
- Stay updated with new releases and trailers.
- Create and manage a watchlist.
- Watch content in the best possible quality.

Behavior

- Watches movies 4–6 times per week.
- Explores trailers before watching.

- Reads reviews and ratings from trusted sources.
- Saves interesting content to a watchlist.
- Prefers late-night and weekend movie sessions.

Frustrations

- Too many OTT platforms make content discovery difficult.
- Irrelevant recommendations waste time.
- Advertisements interrupt viewing experiences.
- Difficulty finding where a movie is available.
- Spoilers in reviews and thumbnails reduce enjoyment.

Needs

- Personalized movie recommendations.
- Easy search and filtering options.
- Notifications for upcoming releases.
- Cross-platform watchlist support.
- Clean and user-friendly interface.
- Reliable ratings and reviews.

Conclusion

This user persona helps identify the needs, goals, and challenges of a typical movie enthusiast. Understanding Vijay's preferences allows designers to create a more personalized and efficient movie recommendation platform. The insights gained from this persona can improve user satisfaction, engagement, and overall application usability.
